EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

User Login Process:

User enters email & password. Password is checked safely using PHP password_hash().

Session Initialization:

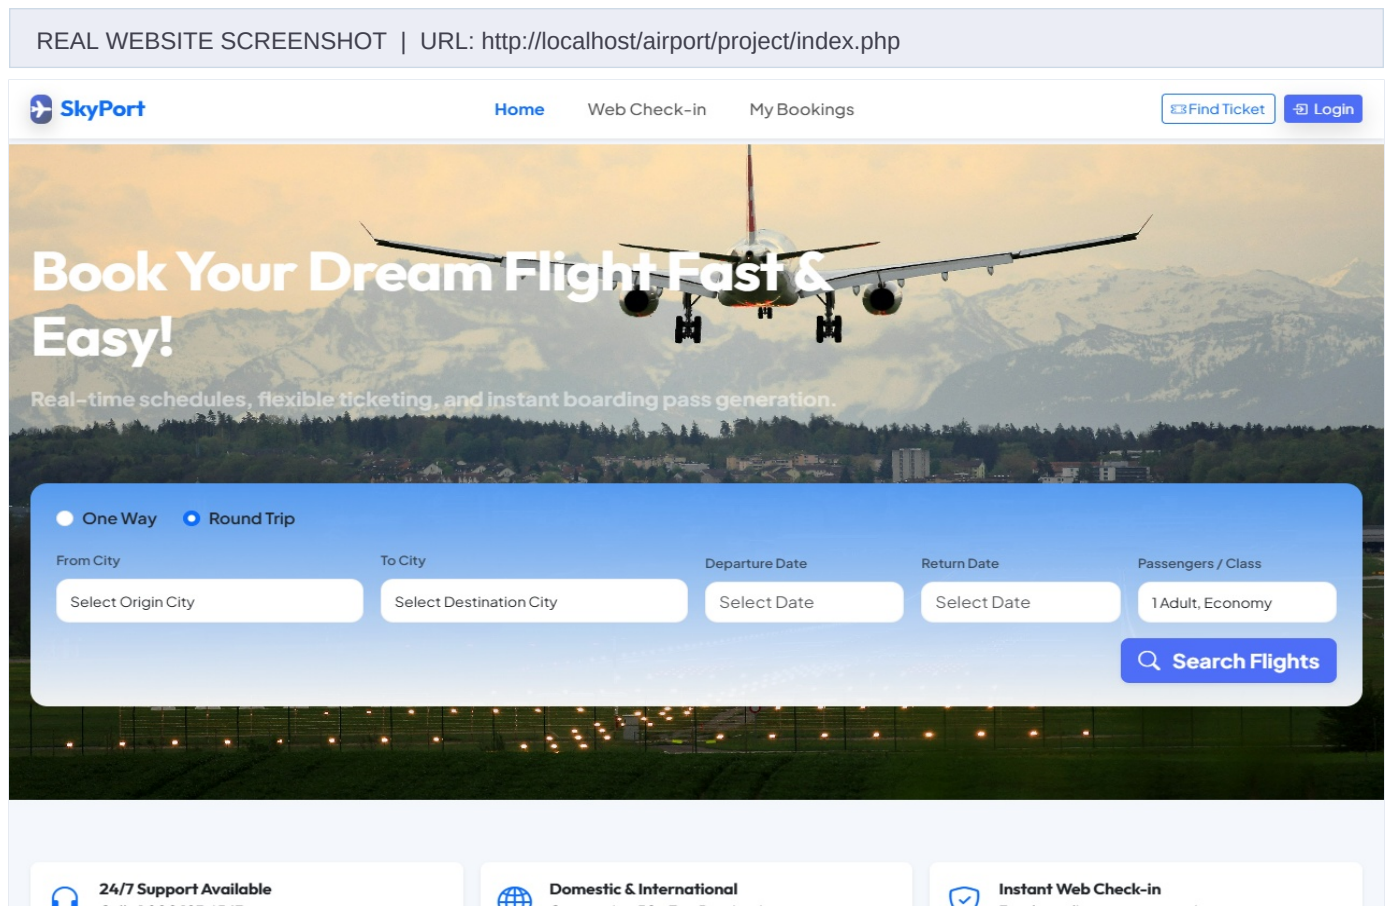

User email is saved in \$_SESSION['user_email'] so you stay logged in securely.

Clean Page Redirect:

After login, user redirects straight to index.php without exposing passwords in URL.

Step 2 -- Home Page & Dynamic Flight Search Box (index.php)

REAL WEBSITE SCREENSHOT | URL: <http://localhost/airport/project/index.php>

☐ One Way ☒ Round Trip

From City To City Departure Date Return Date Passengers / Class

Select Origin City Select Destination City Select Date Select Date 1 Adult, Economy

Search Flights

24/7 Support Available Domestic & International Instant Web Check-in

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Flight Search Box:

User picks Origin city, Destination city, Departure date, and Passengers counter.

Dynamic City Hiding Feature:

Selecting 'Delhi' in From city automatically hides 'Delhi' from To city dropdown in real-time.

Date & Passenger Selection:

Flatpickr calendar picks travel dates easily while counters set Adult/Child travelers.

Step 3 -- Flight Fleet Selection & Ticket Fares (flight.php)

REAL WEBSITE SCREENSHOT | URL: http://localhost/airport/project/flight.php

The screenshot displays the SkyPort website interface. At the top, there's a navigation bar with 'Home', 'Web Check-in', and 'My Bookings' links, along with 'Find Ticket' and 'Login' buttons. The main header area shows the SkyPort logo and a search bar with 'Delhi → Mumbai' and a 'Modify Search' button. Below this, it indicates 'Departure: Tue, 15 Sep 2026 | 1 Adult, Economy'. A 'SORT BY' section offers options: 'Lowest Price' (selected), 'Fastest', and 'Departure Time'. A 'Showing 10 Flights Available' badge is present. On the left, a 'Filter Options' sidebar includes a search for 'Airline / Flight' (e.g., IndiGo, 6E...), an 'Airline' filter (All Airlines), and a 'Max Ticket Price' filter (₹5,200). The main content area shows a flight card for SpiceJet (SG-104 • Boeing 737 MAX 8) with a departure time of 11:20 from Delhi and an arrival time of 13:35 in Mumbai, with a duration of 2h 15m. It also mentions 'Refundable Ticket' and a 'Flight Details' link. To the right, the 'Total Fare (1 Passenger)' is ₹4,450 (₹4,450 base x 1 pax), with a 'Select Flight' button. A '34 Seats Left' badge is shown above the flight card, and a '25 Seats Left' badge is shown below it.

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Real Fleet Search Results:

Queries flights.json and displays matching flight schedules across Indian metro hubs.

Airline Logos & Timings:

Displays IndiGo, Air India, SpiceJet logos with departure time, arrival time, and duration.

Live Ticket Pricing:

Shows clear ticket prices per passenger and dynamic route schedule generator.

Step 4 -- Passenger Details & Checkout Form (detail.php)

Credit / Debit Card UPI / GPay / PhonePe Net Banking

SKYPORT BANK CARD VISA

CARD HOLDER EXPIRES
CARDHOLDER NAME MM / YY

CARDHOLDER NAME

Enter name as printed on Card

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Payment Method Selection:

Choose Credit/Debit Card, UPI Instant, or NetBanking payment option.

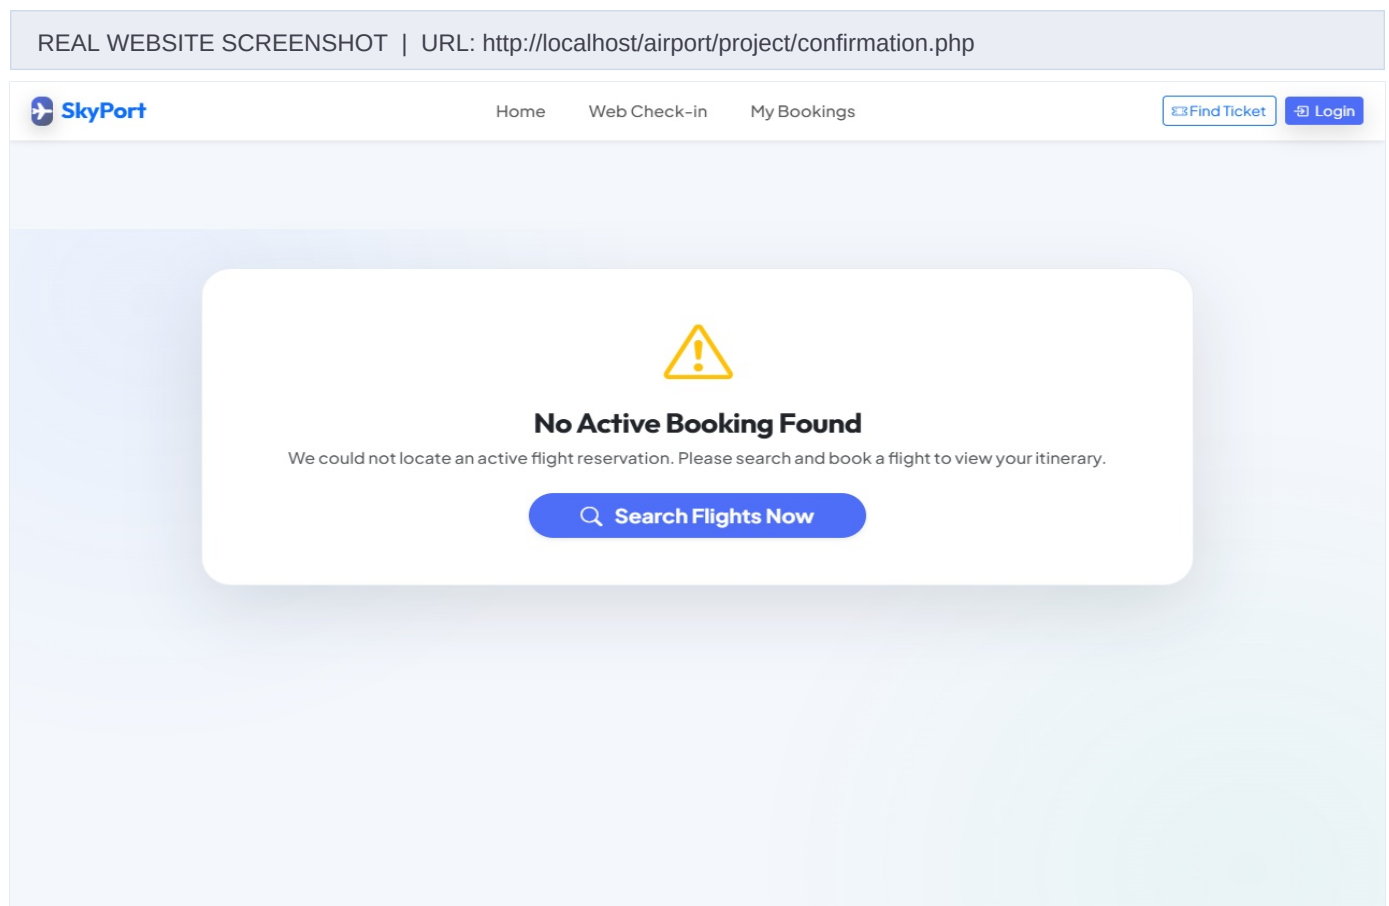

Live OTP Pop-up Modal:

Interactive simulated OTP verification pop-up modal appears for payment approval.

6-Character PNR Generation:

Entering OTP generates a unique 6-character PNR code (e.g. SKP982) and saves to bookings.json.

Step 6 -- Booking Confirmation & Digital Ticket Stub (confirmation.php)

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Success Banner & Copy PNR:

Green pulse icon shows booking is confirmed. 1-Click Copy PNR button copies code.

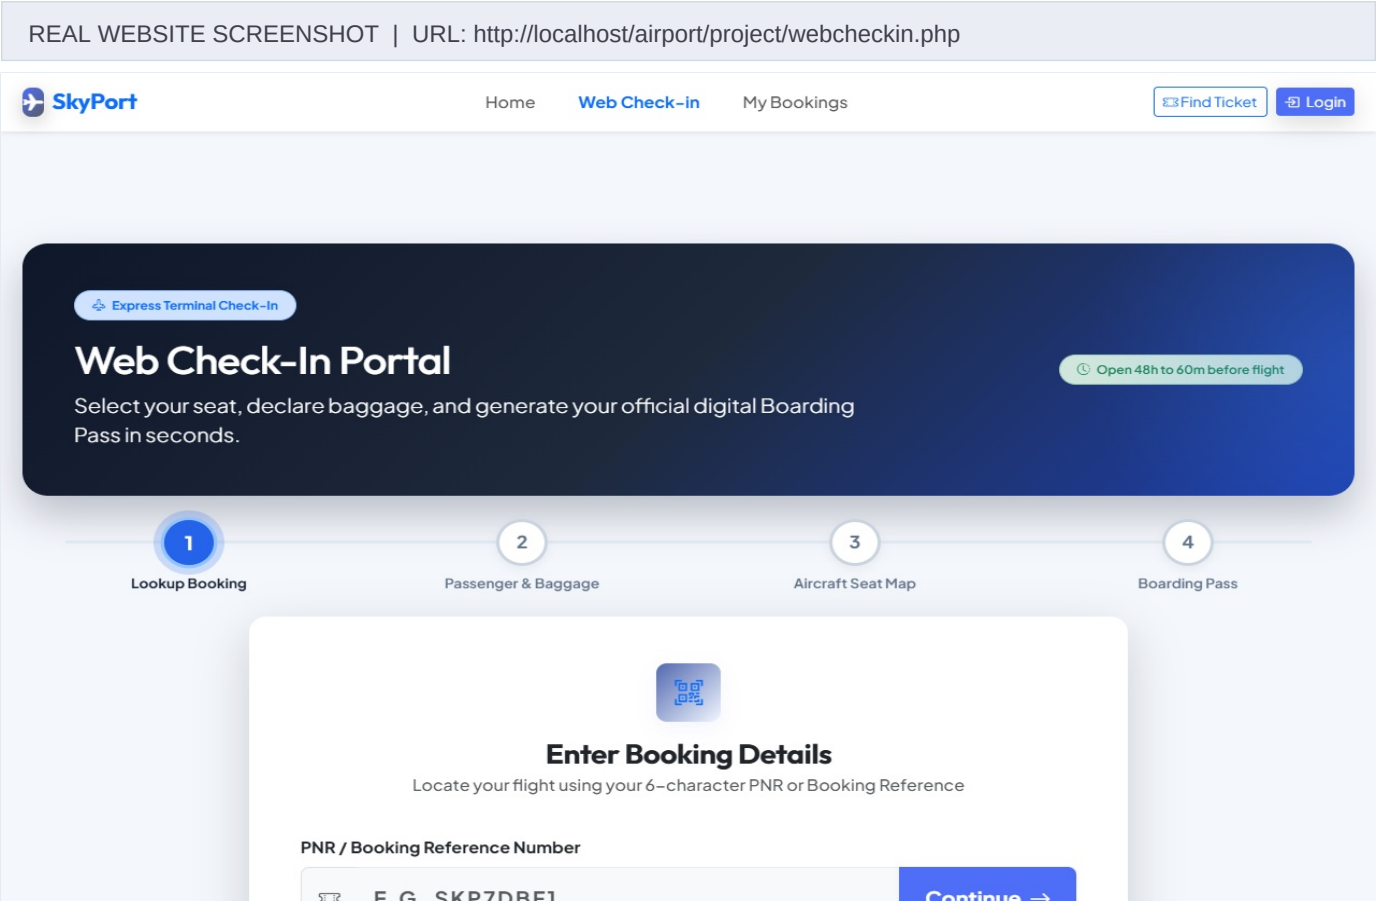

Pure PHP Vector PDF Ticket:

Clicking 'Download PDF Ticket' streams a clean A4 PDF ticket created directly in PHP.

Automated Notifications:

Sends formatted E-ticket HTML email and SMS confirmation message.

Step 7 -- Instant Web Check-In & Gate QR Pass (webcheckin.php)

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

- 30-Second Web Check-In:**
Enter 6-character PNR code to retrieve ticket itinerary instantly.
- Interactive Seat Selection:**
Passenger picks aircraft seat (e.g. Seat 12F) and meal preferences.
- Digital Boarding Pass & QR Code:**
Generates live Boarding Pass with Gate A12 / Zone 2 QR Code for terminal scanners.

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Traveler Trips Dashboard:

Automatically retrieves all user tickets via logged-in email or PNR search.

Admin Cancellation Sync:

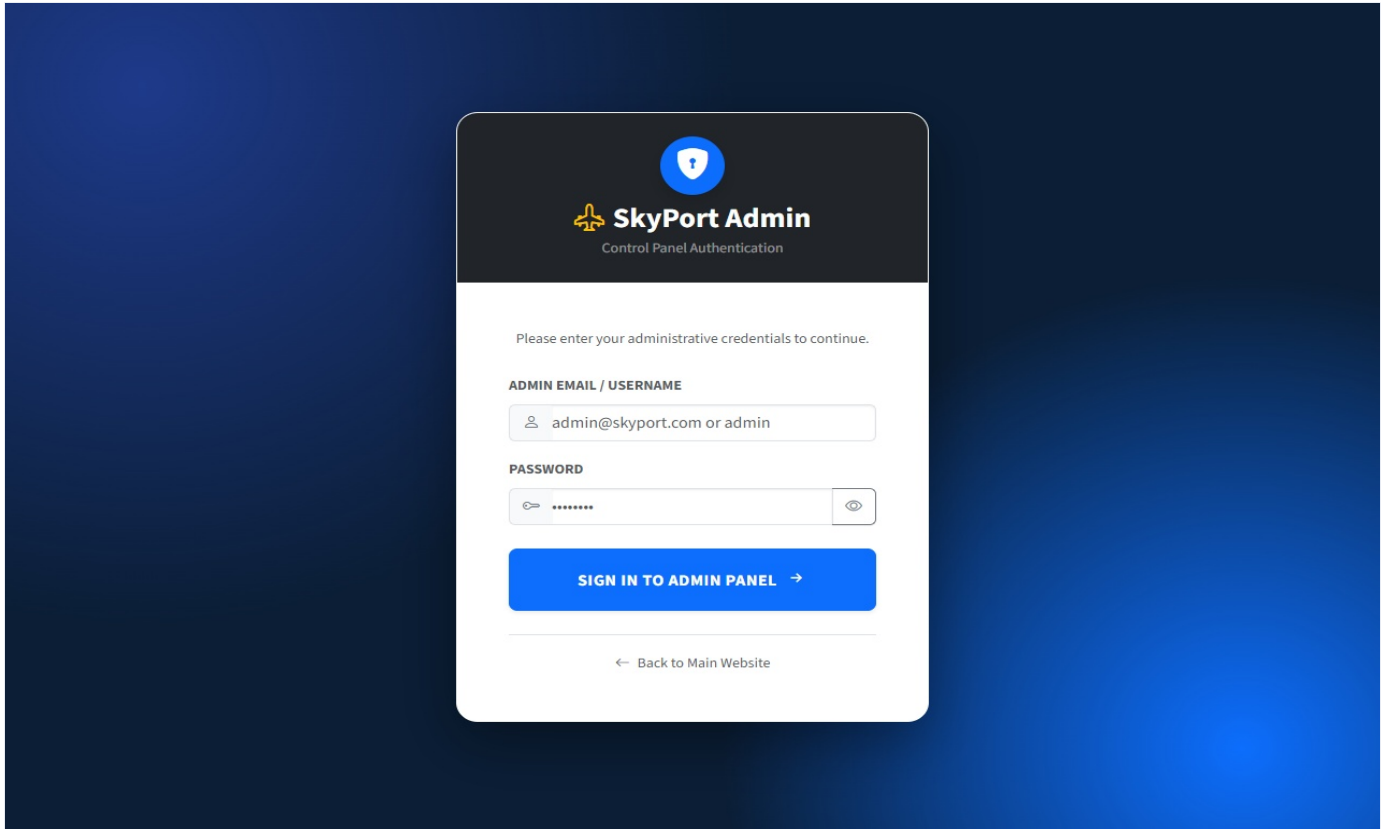

If Admin cancels a flight schedule in Admin Panel, ticket shows a bold red CANCELLED status badge.

Quick Action Pills:

Enables downloading PDF tickets and viewing boarding passes directly from dashboard.

SkyPort Project Documentation -- Page 9 of 10

REAL WEBSITE SCREENSHOT | URL: <http://localhost/airport/project/admin/index.php>

EASY UNDERSTANDING -- HOW THIS FEATURE WORKS:

Q1: Database Used?

Lightweight JSON Flat-File Database (flights.json, bookings.json) with file locks.

Q2: Special Feature?

Dynamic City Hiding in search box so users cannot pick same origin & destination.

Q3: Admin Cancellation?

Deleting a flight in Admin panel marks passenger booking as Cancelled in My Bookings.
